

KOHANTAJ

Kohan Soft Magic

Semi macro silicone softener

Physical Properties

Chemical composition :Block Silicone Copolymers

Chemical structure: Semi macro

Appearance: Milky liquid

Ionic structure: Nonionic-slightly cationic

pH: 6

Active content: 24%

Advantages

- Suitable for all types of cotton, viscose, and blended fabrics.
- Provides a soft and smooth hand feel to the fabric.
- Stable in acidic condition (PH 4) up to boiling point and in alkaline (PH 10) up to 35°C in electrolyte solution.
- Stable in calcium-containing hard water at 250 ppm up to 70 °C.
- **Kohan Soft Magic** can be used in foulard system.
- Compatible with **Kohan stat new** and **Kohan stat GTS**.

Application

Depending on the desired hand feel and softness, use 10-30 g/L in foulard system.

Packaging and Storage

- Available in 110 kg and 1000 kg IBC drums.
- It can be stored in original containers at room temperature for 6 months.
- Keep away from direct sunlight and frost.

KOHANTAJ

Note

- Before mixing and using with other chemicals, it must be evaluated in the laboratory.
- Stability tests were conducted at 30 g/l concentration, Anti Statics at 20 g/l.
- Testing was conducted using sodium chloride as the electrolyte.
