

KOHANTAJ

Kohan Soft Saral

Silicone Softener

Physical Properties

Chemical composition: Second Generation of Amino Silicone Oils

Chemical structure: Micro emulsion

Appearance: Clear liquid

pH: 4

Density: 1.02

Ionic structure: Nonionic

Advantages

- Suitable for all types of cotton and blended fabrics.
- Provides a soft and smooth hand feel.
- **Kohan Soft Saral** can be used in foulard system.
- Stable in acidic condition (PH 4) and alkaline (PH 10) up to 70°C.
- Has no yellowing, staining, or color changing effects on the fabric.
- Slight deepening properties on fabrics especially on cotton blends.
- Stable in electrolyte solution up to 55°C.

Application

Depending on the desired hand feel and softness use 10-30 g/l in foulard system.

Packaging and Storage

- Available in 110 kg and 1000 kg IBC drums.
- It can be stored in original containers at room temperature for 6 months.
- Keep away from direct sunlight and frost.
- Close the container lid tightly after each use.

KOHANTAJ

Note

- Before mixing and using with other chemicals, it must be evaluated in the laboratory.
- Stability tests were conducted at 30 g/L concentration.
- Testing was conducted using sodium chloride as the electrolyte
