

KOHANTAJ

Kohan Wash Vigor

Special soaping agent for denim industry

Physical Properties

Chemical composition: Mixture of various surfactants and polymers

Appearance: Yellow liquid

Ionic structure: Nonionic

pH (25°C): 3-4

Solubility: Easily soluble in cold water at any ratio

Advantages

- soaping agent designed for post-dyeing washing processes, highly suitable for print applications on cotton fabrics.
- High dispersing properties prevent accumulation of particles on fabric surfaces.
- Usable in all aqueous processes to soften water with its uniformity, dispersing, and softening properties.
- **Kohan Wash Vigor** has corrosion inhibitor properties.
- In continuous bleaching systems performances effectively by penetrating and stabilizing properties.
- In dyed products neutralizing process with reactive dyes, acidic pH plays a beneficial role.
- It is much more effective at boiling point.
- With anti-staining property.
- Suitable for automation systems by taking the least time in production line and improving final quality.

Application

The recommended dosage in exhaust system: 0.5 g/l

Packaging and Storage

- Available in 110 kg plastic drums.
- It can be stored in original containers at room temperature for 6 months.
